About us

- With a committed history of more than Fifteen years, Access Communication Solutions (ACS) has successfully captured professional presence in IT and surveillance industries of both UAE and Pakistan.

- ACS was established in the Internet City - Dubai by the Emitac Group (Bukhatir Gobash Investments) in 2003 and remained active as a registered company in that region till 2009. In May 2007, ACS joined the IT market of Pakistan at Karachi, later expanding its services to Islamabad and Lahore. ACS was then acquired from Emitac Group by Qasmia Group.

- ACS holds pride in the fact that it is based on a team of certified professionals for Project Management, Video Surveillance Management, Cyber Security, Data Centers and Infrastructure Management under the directorship of Mr. Ahmed Khan Qasmi and Mr. Mahmood. Team ACS ensures maximum level of client satisfaction, quality products & services and most importantly premium support to all the valued clients.

- During all these years, ACS has proved to be the unparalleled service provider for Government, Telecom, Media, Health Care, Construction and Education sectors, for both local and international clients.

- To ensure maximum level of quality and client convenience,ACS holds state of the art infrastructure for congenial working environment in Karachi, Lahore & Islamabad.

CA Technologies

CA's Enterprise Software solutions link everything from mobile to mainframe, integrating systems of record providing AI-driven systems to deliver business agility with quality, security and compliance. Enterprise Software solutions for both private and public cloud consists of Project Portfolio Management, Automation, API Management, Continuous Testing, Security and AIOps.

Project Portfolio Management

Eliminate annual planning and build top-down plans in minutes—adding work, resources and budgets with drag-and-drop ease. Our project portfolio management software enables teams to communicate business outcomes across the organization, allowing stakeholders to agree on a common set of objectives.

Continuous Testing

As the application economy pressures companies to roll out applications more quickly, CA offers the tools you need to get started on the path to continuous testing through CA Agile Requirements Designer, CA Service Virtualization, CA Test Data Manager, CA Continuous Delivery Director, and BlazeMeter solutions.

Automation

Today's business world is more competitive than ever as advances in technology disrupt every industry. To remain relevant, you need to free up resources to focus on strategic imperatives that drive revenue, retain customers and enable agility. Automation solutions from CA achieve this by automating all business processes to deliver the fully automated agile enterprise.

Security

The depth and breadth of CA's enterprise security software—from API security, identity and access management and privileged access management to fraud and risk detection and prevention—helps protect 49 of the Fortune 50 organizations in the world and provides you the ability to propel your businesses forward into the new digital world.

API Management

CA helps transform your business with full lifecycle API Management. CA API management solutions ensure your digital strategy has the right foundation to capitalize on new opportunities and help bring your enterprise data to life at every stage of the life cycle.

AIOps

CA delivers solutions that fuel advanced AIOps, providing the capabilities that IT teams need to manage their dynamic, hybrid environments through solutions including CA Digital Experience Insights, CA Operational Intelligence and Automic Service Orchestration. Combined, CA AIOps solutions enable service-driven, autonomous remediation.

CA Technologies makes software that helps businesses complete
